

BOWERS ELECTRICALS LTD

FOR EQUIPMENT NEW OR REFURBISHED – ANYTIME – ANYWHERE

Range of Services

Bowers Electricals Ltd. provides Industry and Commerce with a complete design, manufacture, supply, installation, testing and commissioning service all from one source.

We operate a recognised Quality system to BS EN ISO9001: 2000 and all our clients are encouraged to visit our works so they can see for themselves the first class manufacture, repair and service facility at our Heanor works. Vast stocks of refurbished equipment are held and are available for completion to customers' requirements. ALL this equipment can be installed utilising our in-house installation teams.

Manufactured and New Products:

The company manufactures it's own range of Distribution, Power and Special transformers made specifically to suit customers' own requirements. To augment this, we also manufacture LV switchgear and supply a wide range of HV Switchgear on short lead times, again to customers' needs. Other new products include stocks of AC and DC motors, Gearboxes, Fans along with many Motor spares.

Refurbished Products:

Bowers Electricals carry one of the largest stocks available of refurbished equipment, including transformers up to 90MVA, backed up by an extensive range of HV and LV switchgear, which can be re-manufactured to suit customers' particular requirements. Also available are substantial stocks of AC and DC motors up to 5000 kW and associated equipment, including Rectifiers, Motor Generator Sets and Inverters, etc. Customers' own property can also be refurbished or modified at our works.

Repair/Service/Customers' Property:

Our Service Division can undertake most types of Electrical and Mechanical repairs required in industry today. These repairs include full and partial rewinds of motors up to 500 kW along with rewinding of transformers on quick lead times. Mechanical repairs are routinely undertaken on motors, gearboxes, and traction equipment using our extensive facilities. The company offers on-site servicing and maintenance of customers' own property equipment.
